We also operate *Summer Soccer Camps, Monthly Training Courses, Team & Group Soccer Tours* and *Pro Football Trial Events*.

EduKick believes that living, studying and training in a foreign country is an invaluable experience that a player will never forget and the benefits of such an experience will be embedded positively into that individual for the rest of his or her life. At the end of the academic year long course, we hope and expect EduKick players to develop a keen sense of *intercultural competence* (the ability for one to understand a culture other than his or her own) and to be able to communicate (at some level) in the new language.

EduKick staff, keenly aware of the challenges that our soccer boarding school academies presents to our players, are fully committed to our players' overall education through our soccer development academic courses. Living, playing soccer and studying in a different country as a teenager or young adult represents an enormous challenge for both the participant and the educators. From the participant courage, effort and character are required to succeed. From the EduKick staff, it demands professional guidance, supervision, mentorship and expertise in order to provide the required level of service needed for our players to succeed and benefit invaluablely from their experience abroad with us. At EduKick, we aim to deliver on that service and create an atmosphere across all our academy venues conducive to learning, developing, growing and maturing as a person and as a soccer player.

With this in mind, it is very important that participating students and their parent's expectations for the program match exactly that which we are capable and confident of offering. That is why we have prepared this ***EduKick General Course Manual*** to give you an overview of the EduKick programs offered.

EduKick Inc. wants to reassure all student-players and parents of our 100% commitment to our EduKick players' education and well being while attending any of our programs. ## **i. EduKick Football Development**

EduKick programs expose players to high-level technical soccer training that is designed to be intense, educational and progressive...but also fun. Players attend 2-3 hours of structured, professionally run training sessions daily (Monday – Friday).

EduKick soccer training sessions give specific attention to conditioning and fitness but the main priority is on individual ball skill and technical development/enhancement. EduKick's worldwide programs are affiliated with professional soccer clubs, coaches, schools and academies. Our technical coaching staff are seasoned FIFA (Federation International Futbol Association) licensed coaches and often former professional players. EduKick coaching staff understands participants attend the programs to learn and become better players. Our coaches are committed to providing quality and enthusiastic technical expertise to ensure that our participants develop as soccer players.

## **j. Language Classes**

All EduKick programs contain a language learning component. Whether participants are attending a summer camp, Year Long program or visiting as part of a team tour or larger group (optional) they have the opportunity to learn the basics or become proficient with the language of the country they are visiting.

Students are administered a language level examination and are then placed in classes based upon their test results. Classes are divided into the appropriate levels based on demographics and exam scoring. In order to motivate and meet the needs of our students the programs provide an innovative curriculum from which instructor's choose their teaching items.

Using our curriculum, instructors can customize each class to meet the needs of their particular group of students and develop a program that is sensitive, relevant, and interesting. Concerning methodology, EduKick programs follow the communicative approach to language teaching and learning. While a class may be focusing on a particular aspect of language learning, such as grammar or vocabulary, the methodology used in the class allows students to practice what they have learned right away through meaningful communicative activities.

This approach focuses on giving students the opportunity to practice using the language under the guidance of their instructor.

Our instructors adhere to professional standards and are professionally trained. Small class sizes allow teachers to give each student individual attention and to encourage maximum participation. An average classroom has 15-20 students. At the end of the program, students are given a certificate of completion.

## **k. Academic Courses**

EduKick Year Long Academy programs provide students with academic courses as well as Language immersion:

- Manchester, England : British system GCSE and A-Level, ESL or BTEC Diploma (Sports Science Course)
- Madrid, Spain: Online Study, Spanish language or Private Spanish High School)
- Cannes, France: French Language Study or Online Course Learning
- Perugia, Italy: Italian language Study or Online Course Learning
- Puerto Vallarta, Mexico: High School Grade 7 – 12, Spanish language Study, or Online Course Learning
- Casa Grande, USA - High School Grade 9 – 12 & ESL (US passport holders discounted)
- Heneff, Germany - German language Study or Online Course Learning

**Note:** it is recommended a minimum 200 hours of language study be taken before attempting one of the High School programs if the country you wish to visit is not your first Language. In some cases our affiliate High school will require you to demonstrate your language level prior to being accepted and offered a place of study.

## **l. Online Study**

We recommend that if High School credit is a high priority for a student that wishes to attend one of our academy Year Long programs but the country they wish to visit is not their first language or does not offer the courses they require Online High School study should be considered.

The EduKick academy schools and accommodations offer free Wi-Fi and our own academic staff are happy to assist and guide students who are studying online. Many of our academies have adapted curriculums to include 1 – 2 hours of self-study per day.

We recommend that no more than 3 or 4 subjects be studied online in any Year Long academy program because the nature of the curriculum keeps the participants busy for at least 30 - 40 hours per week and online subjects can take up 8 – 10 hours per week.

Students who require High School credit while abroad should also consider surrounding the EduKick Year Long program with summer school to offset the workload.

## **m. Cultural Excursions & Social activities**

Program itineraries are designed to give an introduction to each country's distinct culture and way of life. All events on summer camps are led by enthusiastic adult bilingual tour guides and monitors. The full day excursions offer students the opportunity to visit many of the most popular destinations and historical places of importance.

Yearlong, half year and monthly itineraries contain cultural excursions designed to introduce participants to the culture and environment of their new surroundings to allow them to explore further in their own free time.

Social activities are also organised by EduKick staff on a regular basis to help team building.
